LEXINGTON.

FRIDAY EVENING, NOVEMBER 3, 1826.

BY AUTHORITY.

BY THE PRESIDENT OF THE UNITED STATES. A PROCLAMATION.

WHEREAS a General Convention of Friendship. Commerce and Navigation, between the UNITED STATES OF AMERICA and His Majesty the King of DENMARK, was concluded and signed at Washing ton, on the twenty sixth day of April last, by HEN-RY CLAY, Secretary of State of the United States, on the part of the United States, and PETER PED-ERSON, Minister Resident from Denmark, on the part of Denmark, the respective Plenipotentiaries of the two Powers; and whereas the said Convention has been duly and respectively ratified by me. by and with the advice and consent of the Senate of the United States, and by His Majesty the King of Denmark, & the ratifications of the same have been exchanged, on the tenth day of August last, at the City of Copenhagen, by John Rainals, Consul of the United States, on the part of the United States and Count Schimelmann, Minister of Foreign Affairs of His Majesty the King of Denmark, on the part of Denmark which Convention is in the words following, to wit:

General Convention of Friendship, Commerce, and Navigation, between the United States of America and His Majesty the King of Denmark.

The United States of America and his Majesty the King of Denmark, being desirons to make firm and permanent the peace and friendship which happily prevail between the two nations, and to extend the commercial relations which subsist between their respective territorids and people, have agreed to fix, in a manner clear and positive, the rules which shall in future be observed between the one and the other party, by means of a General Convention of Friendship, Commerce, and Navigation. With that object, the President of the United States of America has conferred full powers on Henry Clay, their Secretary of State, and His Majesty the King of Denmark has conferred like pow-ers on Peter Pederson, his Privy Counsellor of Legation, and Minister Resident near the said States, Knight of the Danneborg, who, after having exchanged their said full powers, found to be in due and proper form, have agreed to the following arti-

ARTICLE 1.

The contracting parties, desiring to live in peace and harmony with all the other nations of the earth sons attached to their necessary service, they not sons attached to their necessary service, they not by means of a policy frank and equally friendly being natives of the country in which the Consulrewith all, engage, mutually, not to grant any particsides, shall be exempt from all public service, and and navigation, which shall not immediately be come common to the other party, who shall enjoy the same freely, if the concession were freely made or on allowing the same compensation, if the concession were corditional.

AKTICLE 2. The contracting parties being likewise desirous of placing the Commerce and Navigation of their respective countries on the liberal basis of perfect equality and reciprocity, mutually agree that the citizens and subjects of each may frequent all the coasts and countries of the other, (with the excep tion hereafter provided for in the sixth article, and reside and trade there in all kinds of produce manufactures, and merchandise; and they shall enjoy all the rights, privileges, and exemptions, in navigation and commerce, which native citizens or subjects do, or shall enjoy, submitting themselves to the laws, decrees, and usages, there established, to which native citizens or subjects are subjected. But it is understood that this article does not include the coasting trade of either country, the regulation of which is reserved by the parties, respectively, according to their own separate laws.

ARTICLE 3

They, likewise, agree that whatever kind of produce, manufacture, or merchandise, of any foreign country, can be, from time to time, lawfully imported into the United States, in vessels belonging wholly to the citizens thereof, may be also imported in vessels wholly belonging to the subjects of Denmark; and that no higher or other duties upon the tonnage of the vessel or her cargo shall be levied and collected, whether the importation be made in vessels of the one country or of the other. And, in like manner, that whatever kind of produce, manufacture, or merchandise, of any foreign country, can be, from time to time, lawfully imported into the dominions of the King of Denmark, in the vessels thereof, (with the exception hereafter mentioned in the sixth article,) may be also imported in vessels of the United States; and that no higher or other duties upon the tonnage of the vessel or her cargo shall be levied and collected, whether the importation be made in vessels of the one country or of the other. And they further agree, that whatever may be lawfully exported or re-exported, from the one country in its own vessels to any foreign country, may, in like manner, be exported or reexported in the vessels of the other country. And the same bounties, duties, and drawbacks, shall be allowed the collected, whether such exportation or re-exportation be made in vessels of the United States or of Desmark. Nor shall higher or other charges of any kind be imposed, in the ports of one party, or vessels of the other, than are, or shall be payable in the same ports by native vessels. ARTICLE 4.

No higher or other duties shall be imposed on the importation into the United States of any article, the produce or manufacture of the dominions of His Majesty the King of Denmark; and no higher or other duties shall be imposed on the importation in to the said dominions of any article, the produce or manufacture of the United States, than are, or shall be, payable on the like articles, being the produce

posed on the exportation r importation of any ar-

ARTICLE 5. Neither the vessels of the United States northeir are or may be paid by the most favored nation.

shall not equally extend to all other nations.

Islands, and Greenland, not to places situated beyond the Cape of Good Hope, the right to regulate the direct intercourse with which possossions and places is reserved by the parties respectively. And it is further agreed that this Convention is not to extend to the direct trade between Denmark and the West India Colonies of his Danish Majesty, but in the intercourse with those Colonies, it is agreed. that whatever can be lawfully imported into or exported from the said Colonies in vessels of one party from or to the ports of the United States, or from or to the ports of any other foreign country, may, in like manner, and with the same duties and charges applicable to vessels and cargo, be imported into or exported from the said Colonies in vessels of the ARTICLE 7.

The United States and His Danish Majesty mu tually agree, that no higher or other duties charges or taxes of any kind, shall a levied in the territories or dominions of either party, upon any personal property, money, or effects, of their respective citizens or subjects, on the removal of the same from their territories or dominions reciprocally, either upon the inheritance of such property, mon ey, or effects, or otherwise, than are or shall be payable in each State, upon the same, when removed by a citizen or subject of such State respective

ARTICLE 8.

To make more effectual the protection which the United States and His Danish Majesty shall afford in future, to the navigation and commerce of their respective citizens and subjects, they agree mutually to receive and admit Consuls and Vice Consuls in all the ports open to foreign commerce, who shall enjoy in them all the rights, privileges and immunities, of the Consuls and Vice Consuls of the most favored nation, each contracting party, however, remaining at liberty to except those ports and places in which the admission and residence of such Consuls may not seem convenient.

its circumference thirty feet.

4. A TRANSPARENT CLIMATE INSTRUMENT

ARTICLE 9. In order that the Consuls and Vice Consuls of the contracting parties may enjoy the rights, privileges, and immunities, which belong to them, by their public character, they shall, before entering on the exercise of their functions, exhibit their commission or patent in due form to the Government to which they are accredited; and having obtained their exequatur, which shall be granted gratis, they shall be held and considered as such by all the authorities, magistrates, and inhabitants, in the Consular district in which they reside.

ARTICLE 10.

also from all kinds of taxes, imposts, and contributand Saturdays of the three tions, except those which they shall be obliged to ginning of course with MONDAY, NOVEMBER 13th pay, on account of commerce, or their property, to which inhabitants, native and foreign, of the country in which such Consuls reside, are subject, being in every thing besides subject to the laws of the respective States. The archives and papers of the Consulate shall be respected inviolably, and under no pretext whatever, shall any magistrate seize or in any way interfere with them.

ARTICLE 11. The present Convention shall be in force for ten years from the date hereof, and further until the end of one year after either of the contracting parties shall have given notice to the other of its intention to terminate the same; each of the contracting parties reserving to itself the right of giving such notice to the other at the end of the said term of en years; and it is hereby agreed, between them, that, on the expiration of one year after such notice shall have been received by either, from the other party, this convention, and all the provisions thereof, shall altogether cease and determine.

ARTICLE 12. This Convention shall be approved and ratified by the President of the United States, by and with the advice and consent of the Senate thereof, and by His Majesty the King of Denmark, and the ratifications shall be exchanged in the city of Copenhagen, within eight months from the date of the signaure hereof, or sooner, if possible.

In faith whereof, we, the Plenipotentiaries of the United States of America, and of his Danish Majesty, have signed and sealed these presents. Done in triplicate, at the city of Washington, on the twenty-sixth day of April, in the year of our Lord one thousand eight hundred and twenty six, in the fiftieth year of the Independence of the United States of America.

H. CLAY PR. PEDERSEN.

Now, therefore, be it known, that I, John Quin-Y ADAMS, President of the United States, have caused the said Convention to be made public to he end that the same, and every clause and article hereof, may be observed and fulfilled with good aith by the United States and the citizens thereof. In witness whereof; I have bereunto set my hand and caused the seal of the United States to be

Done at the City of Washington, this fourteenth day of October, in the year of our Lord one thousand eight hundred and twenty-six, and of the Independence of the United States the fifty-

By the President: JOHN QUINCY ADAMS. H. CLAY, Secretary of State. Publishers of the Laws of the United States

vill publish this Proclamation in their papers.

Mr. Clay to Mr. Pedersen. DEPARTMENT OF STATE,

Washington' April 25, The undersigned, Secretary of State of the United States, by direction of the President thereof, has the honor to state to Mr Pederson, Minister or manufacture of any other foreign country. Nor | Resident of His Majesty the King of Denmark, that

shall any higher or other duties or charges be in- it would have been satisfactory to the Government posed in either of the two countries, on the exporting the United States, if Mr. Pederson had been tation of any articles to the United States, or to charged with instructions in the negotiation which the dominious of His Majesty the King of Denmark, has just terminated, to treat of the indemnitles to 2 50 respectively, than such as are, or may be, payable citizens of the United States, in consequence of on the exportation of the like articles to any other the seizure, detention, and condemnation of their the seizure, detention, and condemnation of their 1 00 foreign country. Nor shall any prohibition be im- property, in the ports of His Danish Majesty. But as he has no instruction to that effect, the under signed is directed, at and before proceeding to the States, or of the dominions of His Majesty the King signature of the Treaty of Friendship, Commerce, signature of the Treaty of Friendship, Commerce, of Denmark, to, or from the territories of the Unit- and Navigation, on which they have agreed, explied States, or to or from the said dominions which citly to declare, that the omission to provide for those indemnities is not hereafter to be interpreted as a waiver or abandonment of them by the Government of the United States, which, on the concargoes shall, when they pass the Sound or the trary, is firmly resolved to persevere in the pursuit Belts, pay higher or other duties than those which of them, until they shall be finally arranged, upon of them, until they shall be finally arranged, upon ARTICLE 6.

The present convention shall not apply to the Northern possessions of His Majesty the King of Deumark, that is to say, Iceland, the Ferrae Islands, and Greenland, not to all the processions of the Treaty, in the above particular, or of the views of the American Government, the undersigned requests that Mr. Pedagarant is signed requests that Mr. principles of equity and justice. And, to guard athis official declaration to the Government of Denmark. And he avails himself of this occasion to tender to Mr. Pedersen assurances of his distinguished consideration.

H. CLAY. The Chevalier PEDERSEN, Minister Resident from Denmark.

The Chivalier Peter Pedersen to Mr. Clay Washington, 25th April, 1826. The undersigned Minister Resident of his Maesty the King of Denmark, has the honor, herewith, to acknowledge having received Mr. Clay's official note of this day, declaratory of the advanced claims against Denmark, not being waived on the part of the United States, by the Convention agreed upon and about to be signed, which note he as requested, will transmit to his Government. And he avails himself of this occasion to renew to Mr. Clay assurances of his distinguished conside-

ROM THE SARATUGA SENTINEL. ON LIVE FENCES.

Perhaps there is no one subject calculated to produce so much anxiety and apprehension among the farmers of this country, as the deficiency in fencing materials: this deficiency is, at present, mostly confined to what is usually termed the pine plains, or pine barrens; and while every day is adding much to the consequence of these lands in an agricultural point of view, is, at the same time, wasting those materials necessary for their enclosure, and consequeut protection of the crop.

In the mountaineous districts, the great quantity of timber yet remaining, and its rapid reproduction where it has once been cleared off, will, probably continue for centuries yet to come to supply all the wants of those who cultivate these lands, and, under a proper course of economical restrictions, may be made to furnish great quantities for the use of those districts less congenial to its growth or reproduction. The expense, however, attendant on the purchase and transportation of rails, will, I apprehead, be found altogether insupportable by the

common farmers of our country. Rails of chesnut (Castanea Amerecana) and black ash (Fraxinus Rubescens) are those most in use, and are least expensive of any that are worth purchasing; these cannot be bought and transported to any considerable distance short of \$5 per hundred. A farm of 160 rods in length and 100 in bredth, will require, allowing 21 rails to every two rods, 3560 rails to enclose it, and, if we suppose the same farm divided into eight rectangular lots, 4830 more rails will be wanted to complete the enclosures, making in the whole, 10290, which at the above price of \$5 per hundred, will amount to \$514 50. Supposing this fence, when well set to last fifty years, which is the longest period it can be supposed to endure, and calculating the interest at seven per cent. per annum the amount, for that time, including the necessary annual repairs, &c. will fall but little, if any, short \$2,500 -and this in actual disbursments of cash, without including any thing for labour.

The fence made with posts, boards, nails, &c. is somewhat more expensive, and, probably, not so durable. Stone wall is still more expensive in the out set, but is, when well wade, imperishable; and where stones can be procured at hand, is undoubtedly the best and cheapest of all fences. There is another species of fence which is now in use in some parts of Europe, particularly in Ireland; it consists of stone wall raised two feet, upon the top of which is inserted the trimmings of the common hedge, and likewise the limbs cut from the fruit trees, in an up right position, in close and regular order, so as to form an effectual barrier to most of the domestic animals. It is called a bearded wall, and is a cheap and convenient resource where stones are not suffi-ciently plenty for a full wall. There are, however but few places (I speak particularly of the pine plains,) where stones occur in sufficient quantity to answer any purpose in this way. The farmer, therefore, who has located himself in such a situation. must look forward to no very distant period, when he will be constrained to adopt some effectual and less expensive mode of protecting his fields, or suffer them to become an exposed and uncultivated waste.

In this situation, the only effectual remedy which presents itself, is the cultivation of live fences. In some parts of Europe, such is the scarcity and high price of timber, that for years past it has not been used for fencing at all; the fields are occasionally enclosed by walls of stone or banks of earth, but by far the greatest proportion of all the enclosures are surrounded by live fences; these are constructed of various shrubs, selected with a view to the situation the fence is to occupy, or the nature of the soil in which it is to grow: hence the sweet briar, (rosa rubigsnosa) the sloe, (prunus spinosa) and the common elder, (sambucus canadensis) are, sometimes, cultivated for fences in England and Ireland, and in the south of Europe, and on the islands in the Me diterranean, the bitter aloe, (aloe spicala) and the prickle pear, (cactus opunta) are in common use; but all the shrubs employed for this purpose, the common haw or white thorn of the north of Europe (crategus oxyacantha) is deservedly the most esteemed in that country.

The quick-set hedge, as it is termed in England. is constructed in various ways, but the most usua mode is that with a ditch and bank, it is commenced by digging a ditch five or six feet wide and about three feet deep; the earth, as it is removed, is placed upon the side of the ditch where the hedge is to stand, and when it is raised about one foot, the quicks, or young plants, being previously cut down to within three or four inches of the roots, are placed horizontally on the edge of the bank, next to the ditch, at the distance of six or eight inches from each other, and the earth is then piled over them to the depth of two feet, making the depth from the top of the bank to the bottom of the ditch about six feet. This ditch and bank serves the double purpose of protecting both the field and young plants from the intrusion of animals. When the plants become sufficiently large to prevent cattle from passing, the ditch is filled up by ploughing down the side opposite to the hedge, and the space is then The subsequent treatment of the hedge consists in little else than preventing the plants from mounting up too high, and in conducting the lateral shoots so as to fill up and secure the vacancies be-

The preference given in Europe to the English white thorn for hedges, has induced almost every writer on the subject of live fences in this country, to recommend their introduction here, and even William Cobbett, the last man in the world that would be suspected of partialties for English thorns observes, in recommending live fences to the attention of our farmers, that "he knows not how to get the plants, unless he brings them or their seeds from England;" and even the experiments of some of our own countrymen, seem to have been conducted rather with a view to the introduction of a foreign shrub, than the cultivation and improvement of

those already inured to our climate. The brategus or haw-thorn, [so called because it produces a berry or fruit, which in England, is called a haw, and this term is applicable to the whole genus, for they all produce the haw,] is a genus of plants belonging principally to North America. Nuttall in his Genera of North American Plants. enumerates eleven species as indigeous to the U States, and Amos Eaton, in his Manual of Botany, describes eight as belonging to the middle and northern states. It would be singular, indeed, if some of these shrubs, inured, as they are, to the vicissitudes of our climate and soil, should not be found more applicable to our purposes of cultiva-

tion, than any that could be introduced from abroad The common thorn bush, (cratagus coccineu the yellow berried thorn, (c. flava) and the cock's spur thorn, (c. crusgalli) all grow wild upon our pine plains, upon the very spot where they are wanted, and by their shape, their size and their hardiness, efford to the enterprising and enquiring agriculturist, the best and surest evidence of the ul-

The seeds of the thorn, if planted immediately after ripening, do not vegetate in less than eighteen or twenty months, and it is necessary, in order to ensure success, at even that period, that they be subjected to a certain process of preparation. For board one of the Steamboats on Wednesday, for this purpose, the thorn berries or haws, are to be New York. A portly gentleman dressed in a gathered as soon as they are ripe in the fall, mixt round about, seited himself upon the box, and as with several times their bulk of rich earth, and ex- the direction was fresh put on, when he crose he posed to the weather in some secure place through the direction was fresh put on, when he crose he so high at any former period, as it was during and their rulers.

The winter; during the ensuing summer, they are to the way of Hungary, states the winter; during the ensuing summer, they are to of his unmentionable. As he walked about the befrequently stirred, and after being exposed another bein er winter to the frost, they will be fit to plant the deck, every one exclained "this side up with following spring, which should be done as early as care" We need not add that the effect was luthe season will permit. They vegetate immediate- dicrous.

the important purpose of live fences.

ly, and will be fit to transplant the pext scason, or! ey may stand in the nursery two or three years o suit the convenience of the cultivator.

In preparing the ground for the reception of the edge, the ditch and bank, as practised in Europe. must be dispensed with altogether, particularly upon the sandy plains; and it is doubtful if the practice will succeed on any soil in the northern states. Saci s the severity of our winters; and the transitions from excessive drought to excessive moisture of our summers, that the banks, however well constructed oon crumble away under the influence of these operations, and the plants, being thrown out of the arth, soon perish for want of sustenance. Prepare he ground, then, where the fence is desired, by simply ploughing four or five furrows, and this is all hat is necessary where the soil is in good order but fit he a light sandy soil, it will be necessary to pass the plough twice or three times back and forward, exactly where it is intended to place the quicks, and the trench or ditch thus made, is to be filled with manure, compost, or swamp muck, or earth from he barn yard will answer the purpose best; when the surface is made smooth and even, draw two parallel lines six inches apart, directly over the manuf ed trench, and having previously prepared the plants by cutting them down to within three inches of the oots, set them on the lines at regular intervals of ten or twelve inches thus:

The spot must now be protected from the intruon of animals by temporary fences, erected for the ourpose, and the plants thus secured, must be kept clean from grass and every theing else which might be supposed to choke or impede their growth. the third or feurth season they are to be again cut lown close to the earth; after which, in the course of two or three years, they become so thick and ompact that nothing can pass them. The subseuent treatment consists in nothing more than simly clipping the ends of the twigs, which is best erformed with shears made for the pnrpose, by which the fence is kept in regular and proper shap

and its closeness greatly increased. This is the whole of the process required, in this ountry, to obtain an effectual and everlasting proection to our fields, a process extremely simple and perfectly within the means of every farmer, and that, without the expenditure of a single cent in

Mr. Davis, of the town of Saratoga Springs, in he county of Saratogo, is the first and only person that I know of, who has attempted the cultivation of ive fences from the native thorn in this vicinity; he uring the past and previous season, planted up wards of 2000 in the manner above described. He procured his plants from the woods and fields where they were growing spontaneously of course hey are of different sizes, and probably, of different species; they, however, appeared to be doing well and, although planted on a light sandy soil, without neasure of any kind, are apparently luxuriant and

Mr. D. informs me that he gathered a quantity of he haws and planted them in his garden; they came p at the usual time, but they were all immediately ate off and destroyed by the grub. He took no pre caution in preparing the seed, they were planted as soon as they were gathered, and they lay in the earth two winters and one summer, before they

howed any signs of vegetating. It is said, that the seed may be made to vegetate overing them with boiling water, in which they are remain till perfectly cool. A process somewhat imilar certainly succeeds with the seeds of the locust, which otherwise are as long vegetating as hose of the thorn.

It has likewise been recommended to immerse the seed for forty-eight hours in a solution of green cowlung and water, kept at a temperature of 100°; the pint to this process, probably grew out of the fact that those seeds which pass through cattle undigest ed, vegetate soon after they are dropped- I am not acquainted with the efficacy of either of these exeriments, but think they are well worth trying. I cannot dismiss this subject without expressin ny surprise and regret that the farmers [particulary in some parts,] of this country have not yet turnd their attention to the cultivation of live fences bey certainly must resort to it, and the sooner they egin the better: they have now, the most of them ufficient fencing materials, at their command for protecting the quicks until they are large enough to protect themselves; but if they delay, a few years will deprive them of these materials, in which case. they must be purchased, and thus an expense incurred that might be dispensed with altogether, if

the work be immediately began. A man, in a common season, may gather seed nough in one day to plant a large nursery, and it these are properly prepared and planted, the young micks will be fit for transplanting the third season.

Let the farmer begin with his outside fences first, ind, if possible, in a field which he intends to till for everal years to come; this will obviate the necessity of any additional projecting fence; for if no animals be permitted to run in the field, an out side fence will be all the protection wanted. At the end of from six to eight years, the plants will have arrived o that state of maturity when no further protection will be needed; this may then be removed to accommodate other places.

Thus by successive planting, say one hundred ods in each year, which will cost the labour of a man two weeks, and that of a team three or four days, he will in five years, with very little other exbense, have a farm of one hundred acres completely surrounded by all the necessary materials for ar everlasting fence; and in twelve years from the first planting of the seed, at the utmost extent, the per severing farmer will begin to reap the reward of his enterprise and exertions in the full maturity of his first efforts, and each successive year will add anoth er, and another portion to that already perfected. intil every lot be securely protected by a fence, as durable as the soil on which it stands.

If we have had discouraging accounts from those who have attempted the cultivation of live fences peretofore, it is because the efforts have been made eather with a view of seeing what might be done han of doing what mustbe done. There is nothing weich gives so much efficacy to an experiment a the necessity which drives us to the measure. Let the hedges, under a full persuasion of the necessity, and I dare venture to say, we shall hear no more of the want of success. Guided by his own observations and reflections. he will soon be able to select the shrub which nature seems to have designed peculiarly for his purpose, his own native thorn in preference to every other.

A young 'clergyman, whose garb did not de signate who he was, and still very anxious to be known, requested the company to guess at his occupation. They happened to be all on the wrong side vexed at their stupidity, he exclaimed, "I am the voice of one crying in the wilderness. timate success of his efforts to cultivate them for "I thought sir," says a wag, "that you resembled

tion, that impressive, and to me almost sublime.

spectacle, an immence drove of wild horses, for before, mixed with other animals, apparently quiet, and gaizing like the rest. Here there known their approach to as, seemed to be their crops of corn, to fatten their swine on. wild and energetic way of expressing their pity and disdain for the servile lot of our horses, of which they appeared to be taking a survey. They were of all colors, mixed, spotted, and diversified with every bue, from the brightest white to clear and shining black; and of every form and structure, from the long and slender racer, to sold in Boston market for some weeks past. those of firmer timbs and heavier mould; and of all ages, from the corvetting colt to the range of patriarchal steeds, drawn up in a line, and holding their high heads for a survey of us, in the rear Sometimes they curved their necks, and made no more progress than just enough to keep pace with our advance. Then there was a kind of slow and walking minuet, in which they performed various evolutions with the precision of the figure of a country dance. Then a rapid movement shifted the front to the rear. But still, in all their evolutions and movements, like the flight of sea fowl, their lines were regular. and free from all indications of confusion .- At times a spontaneous and sudden movement towards us, almost inspired the apprehension of an united attack upon us, after a moment's advance, a snort and rapid retrogade movement seemed to testify their proud estimate of their wild independence. The infinite variety of their rapid movements, their tampering, and manœuvres were of such a wild and almost ter rific character, that it required but a moderate sketch of fancy to suppose them the genii of these grassy plains. At one period they were formed for an immense depth in front of us. A wheel executed almost with the rapidity or thought, presented them hovering on our flanks. Then again, the cloud of dust that enveloped their movements cleared away, and presented them in our rear. They evidently operated as creased indications of fatigue, sufficiently evidenced, with their frequent neighings, what unnuch sooner by placing them in a tub or barrel, and pleasant neighbours they considered their wild compatriots to be. So much did our horses appear to suffer from fatigue and terror in conse quence of their vicinity, that we were thinking of some way to drive them off; when on a sudden patient and laborious donkey of the establishment, who appeared to have regarded all their movements with philosophic indifference, prick ed up his long ears, and gave a loud and most sonorious bray from his vocal shell. Instantly this prodigious multitude and there was thousands of them took what the Spanish call the stompado." With a trampling like the noise of thunder, or still more like that of an earthquake, a noise that was absolutely appalling, they took to their beels, and were all in a few moments invisible in the verdant depths of the plains and we saw them no more."

> Emancipation of Slaves in Texas .- We learn by a gentlemen of this place, who arrived a few cial Advertiser. days since from Miller county that a citizen of that county had returned just before he started from Texas, bringing information that great excitement prevailed throughout the several colonies in that country, when he left there, in conse uence of the recent passage of a law by the Mexican Government, for the Emancipation of Il the Slaves in the Province of Texas, and that orders had been received for carrying it into immediate effect. As may well be supposed, this information produced the greatest consternation mong the slave-holders, all of whom had emigrated to that country under an assurance, as we are informed, from the local authorities of Tex as, that they could not hold their slaves; though we are under the impression that slavery is prohibited throughout the Republic, by the constitution of Mexico.

The large slave-holders were burrying off their slaves in great numbers, into Louisana and Arkansas; and we have heard of several persons who emigrated from this Territory, who have recently crossed the line into Louisana, with their slaves. Those pers as who have but few slaves, have held meetings, at which it was re solved, that they would stand by each other in resisting the execution of the law, until they can gather this year's crop after which they have determined to leave the country

We also learn that the Indians have been very troublesome for some time past, to the colonists. and that in many settlements they were under the necessity of erecting forts for their proteccommon browning farmer undertake the raising of tion, and retreating into them for security Several persons had been killed by the Indians with in a few months, but at the latest advices. the alarm was subsiding. The crops are said to be short this season, and the country very sickly. Arkansas Gazette.

> A gentleman from high up the Arkansas, who came down in a boat a few days ago, informs us that the waters have been higher during the late rise than they have ever been before, within the knowledge of the present inhabitants of Crawford county. Grand river was about four feet, and the Arkaneas and Illinois, 8 inches or two feet higher than they were last spring. Several set tlers on Grand River have had their entire crops swept off by the overflowing of the banks of that river; but our informant heard of little or no he had frequent opportunities of ascertaining it, probibiting their mutilation.

The Quebeck papers state that some chests of treasury, which were lost in a French frigate, sixty-seven years ago, in the river St Lawrence, bout nine miles above Quebeck have been found It is rumered that the value of this property is estimated at one million of Dollars.

FOREIGN.

From the Baltimore Gazette of October 14. Late and interresting advices from Europe fill the greater part of the miscellaneous department of this evening's Gazette. As was anticipated the continued scarcity of some articles of the first necessity to the poorer classes in Great Britain, has nduced the Government to open the ports for the admission of oats, and oat-meal, rye, peas and beaus. The admission extends to the 24th of De cember, subject to the pleasure of parliament, which is to meet on the 14th November for the dispatch of business. This order has had the effect of causing an advance in the price of grain on the continent. At Amsterdam wheat rose 5s. per quarter. Four millions, it is calculated, is the a mount to which the kingdom will become a custo mer to foreign countries. A copy of the order at length will be found among our extracts, and also several articles respecting the state of the manufacturing districts in England, by which it will be seen that the distresses have not abated, although the papers received by former arrivals held on the hope that a speedy change for the better might be calculated on with certainty, from the increasa great annovance to the horses and mules of our ed demands for goods and the regular employment cavalcade. The frighted movements, the in- of workmen; neither of which has taken place to the extent predicted.

There is an indication of renewed troubles in Russia, but the information at present is rather too vague to afford much scope for speculation.

Spain still continues in that state of political dis traction for which her history since the restoration of Ferdinand has become proverbial, and the rap id changes made in his council, shew that the King knows not whom to trust .- Another decree has been issued declaring that no change will be made in the manner of administering the government, and reprobating the idea of the establishment of chambers of deputies from the provinces.

In Portugal another plot to change the government, no doubt formed by the Queen and favoured by the partizans and agents of one of the principal powers of Europe, has been happily discovered and oppressed without bloodshed .-

And last though not least in our esteem, we must remark that GREECE still holds on the doubtful struggle, and several successes have crowned her efforts since the fall of Missolonghi-that she has been nearly as bally treated by the Christian as by the Turk; may be ascertained on perusing the annexed paragraph from the New York Commer-

"We have received a statement of the financial ie Greek Committee in London, made to a meeting of the holders of the Greek bonds, at the City of London Tavern, on the 4th of September We perceive among the items of expenditures, that there have been remitted to the United States, fo the building of the two frigates, about which there has been so much difficulty in this city, the sum of 155,0001.—equal to \$768,883; and that the sum of 12,000% has been allowed to Gen. Lellemand, for one year's services-equal to \$53,496-or more han twice the salary of the President of the United States! Who would not be a patriot at such price? There is an item of 64,000l. charged by Mr Ricardo, for commissioners. When this was read t produced a shower of hissess. How would they have hissed, if they had heared that the patriots of New York had charged \$25,000 each for the rent of the lot on which the frigates were builtrealizing for one year's rent, \$40,000 more than the ee of the lots were worth!

A. M. Bowring has, occording to the London Globe, realised the sum of 10,000l. by the Greek

THE GREEKS AND TURKS.

The accounts from Greece are more favourable hap we have lately received. The Turkish fleet ad attacked the Isle of Samos three times, and aving had two frigates and two brigs burnt by the Greeks were obliged to retire towards Scio. repulse was owing to the arrival of the Greek fleet under Sachtaris, soon after the attack was made It does not appear that the Greeks suffered much in the act.on, with the exception of the loss of the culotier of Canaris, and himself severely wounded. If this intelligence be true, it is thought the Isle will be saved for this year, and the impression which the failure will make on the Greeks, wil probably prevent a renewal of the attack.

Letters from Napoli, give the details of a battle fought near Maina. Ibrahim had advanced on the place with 4000 men, but was defeated with the loss of a large number of men and all his baggage and artillery which fell into the hands of the Greeks. Ibrahim was obliged to escape hastily to Calamata. All his troops in Greece amount to only or 8000 men, so that the Greeks have determined to act on the offensive. The loss of the Greeks in the battle was also severe, and General Nikitas i among the slain. A division of the Greek troops was commanded by the English Colonel Gordon.

The Turks have possession of Athens thro' the treachery of a Greek Captain, who went over to the Turks with 500 men. The Pacha immediately honoured him with the caftan, and discharged the arrears of pay due to his troops. Commodore Hamilton, of the British Ship Campria. with a laudable zeal for the preservation of the relics of antiquity damage being sustained on the Arkansas, though in that city, has procured a firman from the Porte

The Constitutional contains some proclamations We learn from White river, that the oldest and dispatches from the new provincial govern-

tained by the destruction of their crops, many off Turkish Government, has declared to the Divan hat Lord Cochrane was no longer a British subect, and that if he was taken prisoner in the war against the Porte the English Cabinet would not emand him.

From an article in the Pilote it would appear hat things are far from being settled at Constantinople. According to this account, on the 4th ult. the Sultan was attacked on his way to prayers by the populace, who in the first instance, gained some advantage over the soldiery. A scene of bloody retaliation followed, and some hundreds perished on the occasion. The slaughter of every ne "who appeared to be suspicious" continued

through the succeeding day.

Lord Cochrane was in the bay of Cagliari on the 11th of August, with a large steam vessel, waiting or some ships to join him. An expedition of twenty armed vessels with

troops was fitting out at Alexandria. Baron de Krudener, the late Russian Charge les Affairs in Switzerland, is on his way to this country, as the successor of Baron de Thuyl, late Minister from Russia to the United States.

Latest from Brazil -- The Baltimore Patriot of Thursday last, contains a letter dated Rio de Janeiro, September 1, from which we take the following extract:

There seems to be little hope of an accommo. dation of the existing differences between this country and the River Plate, as the Emperor seems determined to listen to no terms whatever, excluding his sovereignty in the Banda Oriental, It is thought the Patriots will soon make an attack on Rio Grande, and apprehensions are entertained that they will be successful, though the imperial forces are numerous.

Another engagement has recently taken place in the River Plate between the two squadrons, in which they both suffered severely. The Captain of one of the Brazilian vessels was dangerously wounded, and the Lieut. of the Netherboy s said to be killed. The contest however was indecisive.

We are fearful this war will yet be productive, of much mischief, and know that the general wish throughout the country is to terminate it by negotiating without further delay.

Trinidad papers to the 20th ult. received at Baltimore, contains the order from the commisioners of his Majesty's treasury, closing the ports of the West India possessions against the shipping of the United States, from and after the 1st of December, accompanied by a commentary laying the whole blame of the proceedings upon he bad policy of the American government, and deprecating the act as an alarming blow to the present commercial relations of the Colonies.

GREAT BRITAIN .- The London papers contain a variety of extracts upon the state of the trade and Manufactures of Great Britain, which show an evident and continued improvement in the general aspect of affairs.

A very general impression prevails that though the opening of the ports has caused a sudden and considerable decline in the prices of grain, such depressions will not be lasting, but that home and foreign corn will, between this and Christmas, experience a considerable advance.

It is said that in consequence of the death of lord Gifford, the following new law appointments will be made. - Sir John Copley the present attorney general, master of the rolls; the solicitor general succeeds Sir John Copely in the office of attorney general; and Mr. Tindal will be appointed solicitor general.

Sir Francis Burdett is now sojourning in Paris, where he and his suite occupy twenty-seven rooms. The Morning Herald says this does not look at if the bad times had extended to the English agriculturalists.

In Ireland the fever produced by the privations they suffer from the want of food and raiment, continued to spread. The alarming state of fever in Limerick, has obliged the governors the hospital to forward a requisition to the mayor for a meeting of the inhabitants. Such s the state of the fever hospital that there are one hundred and sixty patients who, for want of sufficient accommodation, are obliged to lie two or even three in a ted. In Cork and in the county of Wexford, the fever has spread. 'The want of straw beds for the poor aggravate the affliction of the disease. There were 1746 persons admitted into the hospital at Limeric within the last nine months.

The Nuremburgh Correspondent affirms that he king of Bavaria has permitted many officers and subalterns to go and serve Greece. It is added that they will retain their pay and rank in the Bavarian army.

Letters from the Morea, state that Ibrahim Pacha, in consequence of the vexation and fa tigues which he has experienced in the country of the Mainotes, has had several attacks of fever. The Greek committee at Paris, have made a

statement, by which it appears that lord Cochrane sailed from Falmouth in the sloop Porcupine of 20 guns, manned by 120 Englishmen, and was joined by two steamboats, each carrying four 24 pounders, and 2 mortars to carry a hollow ball of 68 pounds. In July, he was to be joined by two French corvettes, carrying 20 to 24 guns manned by Dutchmen, who were engaged when lord Cochrance was in the Netherlands.

A Greek paper announces the death of Gernanos, Archbishop of Patras, and President of the Executive Government of Greece.

Russia.-We find in our paper a new ordinance rom St. Petersburgh, relative to the censorship of the press. Advices from Moscow to the 19th of August. The corporation was positively fixed for the 5th of September. Since the commencement, Lent there has been almost a total absence of balls and amusements. But strangers were tolerated in oing things which were not permitted to the Rus

NIGHT DANCING SCHOOL.

The Medical Lectures commence on Monday next. The first week will be devoted to the delivemy of the introductories by the several Professors.

COMMUNICATED.

IMPEDIMENTS OF SPEECH.

It is presumed it will be no small satisfaction to the public, and especially that portion of it who are afflicted with impediments of speech, to learn, that the institution so recently established in Lexington for their relief, has, so far, been attended with great success; a success, in short, not in the least inferior to what was to have been expected from the extensive reputation, which Mrs. Leigh's mode of treating those distressing visitations has attained

The number of pupils that have entered the insti tution since its commencement, which was about two weeks since, is from 15 to 20; not one of whom but confesses to have already received much benefit, nor entertain a doubt, that a continued observance of the rules of the system will in the end en sure to all complete relief. The improvement of several of the pupils has been so very astonishing, as to entitle it to particular notice. And for this purpose we would first mention the case of a young lady of Shelbyville, (a daughter of the gallant Col. Owen of Kentucky, who was killed at the battle of Tippecanoe in the commencement of the late war.) The situation of this interesting young lady had been such as to excite the sincerest sympathy of her friends and acquaintances. Her impediment of speech was very great. But surprising as it may appear, ten days attendance at the institution of Mr. Yates, the agent of Mrs. Leigh, has completely restored her to the power of easy and fluent utter-ance. So perfect, indeed, is her cure, that at a party which she has since attended in Lexington, several declared, that if they had not been informed of the fact, that she had been a stammerer, they would not have discovered it.

Another case, is, that of Mr. Tutt, a man well known to the people of Lexington, and proverbial ly the Prince of Stutterers. He has been entirely cured by two days! attendance. Some of his acquaintances doubting the fact, put to him questions &c. to confuse, and if possible, to make him stutter. But failing they candidly admitted his cure to be complete. The above are facts, well known to be such to many of the citizens of Lexington. And it is to be hoped they may go far to remove the doubts of the wavering, if any such there yet be, and induce all who may need the assistance of Mr. Yates to place themselves under his care without delay, tance from home, he found it necessary to return for forced to flee, in order to avoid being taken prison-

Chillicothe and Piqua towns, the Indians were reduced path, along which they rightly supposed the huntsman almost to a state of famine, and the warriors were not would pass. As he rode, therefore, near their place of repose until the ensuing spring

after the return of the army from chastising the Indians, the autumn of 1780, some of whom entered the British per, though not so closely as at first. service. A great number of those who had been considered permanent settlers in the country, removed to the old settled country in the autumn of the year 1780. which so discouraged the remaining inhabitants, that children, the country would have been abandoned: men resolutely determined to protect and defend them

Captains Tipton and Chapman, were killed by parties rapidly pursue him. He came therefore to the heroic of Indians who wavlaid the paths on Beargrass. In and almost desperate resolution, to endeavor to kill the pursuit of one of these parties, Capt. Aquilla Whitaker, with 15 men, followed them to the Ohio river at the foot of the Rapids, where they found some canoes, in which he perceived lying together, primed them and which they embarked in order to cross the river in the put them in good order for service He then disguised pursuit; but as soon as they were fairly on board, the himself by putting on a coat belonging to the Indians Indians, who lay concealed under the bank of the riv. and fixing a tomahawk and scalping knife in his belt; er, fired on them, and killed one and wounded nine and placed his own rifle at a little distance off, where others—they instantly relanded, rushed on the Indians the savages would not be likely to observe it, but and defeated them.

near the place where Shelbyville now stands, was so of them would have been to him instant death. exposed, and had so suffered by the Indians, that the inhabitants determined to break up and remove to assault. He took two guns, one in each hand, and ed with women and children, and their household goods, they were attacked by a party of Indians near shot them both at once. The others, as he expected, of his fellow citizens. This is evident from the fact Long run, defeated and dispersed with great slaughter, collected together 30 men, and went in the immediate pursuit of the Indians. Calculating on being pursued, their number killed. Col. Floyd would himself have fallen into the hands of the Indians, but for the manly intrepidity of Capt Samuel Wells, who seeing the Col on foot, nearly exhausted and hard pressed by the enemy, nobly dismounted himself from his own horse, assisted Col Floyd into the saddle, and accompanied forgotten. But what adds greatly to the magnanimity of the act is, that at that time Capt. Wells and Colonel ever seeing him again.

On the 9th of May 1781, M'Afee's Station on Salt respectability, who had been taken by the Indians, and I mourn his loss.

only, and one mortally wounded who died in a few days with cords.

This account of the very extraordinary exploit of all interest in the Western Country seems to call for.

Jefferson afforded no security to the Western settlements, it was evacuated

ments, it was evacuated.

About the same time a party of men on their way from Harrodsburgh to Logan's Station (St. Asaphs)

were attacked by Indians near the former place; two of them were mortally wounded, one of whom was not. withstanding enabled to escape to the Fort. The oth er hid himself behind a log and was carried into Harrodsburgh by a party who went immediately to the place where the attack was made. Col. Logan raised a party of men and went in pursuit of the Indians, but from Mr. Eynard, in Switzerland, that the Greek did not come up with them: On their return home fleet was off Hydra Our last accounts stated that they were fired on by the same or another party of ln. this island was to be made the strong hold of the dians, and one of his men wounded; as soon as the Indians fired they dispersed.

ourse of this year taken by Indians, where the father and a brother of Mrs. Logan (wife of Col. Logan) were killed, and a sister, sister-in law with four children tapany of men, quickly pursued, overtook and defeated children; the fourth was murdered during the action which was for some time doubtful. In this action William Montgomery killed three Indians, and wounded

In the month of May 1782, a party of Wyandot Indians attacked Estill's Station, destroyed a number of cattle killed a white man, and took a negro prisoner. The Indians were 25 in number. Capt. Estill hastily raised the same number of white men, pursued and overtook them, when a bloody conflict ensued, the victory was contested for two hours -- the Indians ultimately prevailthe part of the Indians, it was afterwards understood, marching out to attack Ibrahim Pacha, who was

was equal to that on the part of the whites. On the 10th of August 1782, the Indians took two boys from Hoy's Station in Madison county. They were immediately pursued by Col. John Holder with 17 men, who overtook the Indians, when an action enhaving four men killed and one wounded.

Early one morning in the year 1781, Mr Alexander M'Connell, who resided in the neighborhood of Lexington, wandered into the woods on foot in pursuit of NOTES ON KENTUCKY; SECTION 11. thither for it Three of them remained to watch it, ion of the Greek troops." In consequence of the destruction of the corn at the and two placed themselves in ambuscade near the

One night when the party had reached the banks of if the Indians had not, by stealing their horses, depri- With considerable difficulty and the imminent hazard Those more immediately in ved them of the means of removing the women and of awakening the savages who were snoring around whites, being more skilled, and him, and who were connected to the rope by which he war, although frequently inferior in numbers, sucbut owing to the impossibility of removing them, the was bound, he at length succeeded in drawing the knife ceed in driving their neighbors to the North. with his feet until he could reach it with his hand, The gloomy prospects in Kentucky checked the emil when he cut the cord that confined him, and was enagration to it until the spring of the year 1781, and even bled to rise. His first thought then was to run off, then it was by no means equal to what it had been leaving the Indians asleep; but upon reflection he con. cluded that it would be impossible for him to escape About the first of March 1781, Col. Win. Lynn and in this way, as they would probably soon awake and five Indians, or as many of them as he could With the utmost coolness he proceeded to examine their guns. where he himself could instantly find it. All these | gle, which achieved its independence and liberty. In the month of April, in the year 1781, a Station set. preparations were made at a moment when five Indians tledby Squire Boone, (brother of Col. Daniel Boone,) were sleeping by him, and when the waking of either

All things being ready, he proceeded to make the Beargrass Whilst they were on their way, incumber- placing their muzzles at the breasts of two Indians who were lying on each side of the spot where he had been, he made pretensions to the confidence and esteem, being awakened by the noise, sprang up and stared Col. John Floyd receiving information of this defeat, in amazement. With a third gun he instantly shot at two of them who were close together, killed one, as he ment of this country, it devolved on him, as on afterwards had reason to believe, and mortally woundthe Indians formed an ambuscade, into which Floyd ed the other. The fifth Indian, seeing his companions of gratitude and our pride delight to dwell, to act and his party were unsuspectingly drawn, and one half lying dead about him, and not knowing where to find his arms, and probably in the confusion of the scene: uncertain by how many he was assailed precipitately fled. Mr M'Connell therefore, was left in quiet posfight any more such battles, he took his rifle and proceeded expeditionsly towards home, where, after a tehim on foot. Such illustrious acts ought never to be dious and painful journey, he safely arrived, to the great joy of his friends, who had began to despair of

Some little time afterwards, Mrs Dunlap, a lady of

Triver, about seven miles from Harrodsburg, was attack- retained a prisoner among them on Mad river in the !! ed by a party of Indians. One of the M'Afee's and state of Ohio, made her escape and returned home to another man were on their way from the Station to a the neighborhood of Lexington She stated that shortplantation in the vicinity of the place, on whom the ly after the time when Mr M'Connell made his despe Indians fired and pursued them to the station. The rate and successful assault, one Indian, out of five who siege lasted only about three hours when the Indians had made a journey towards Lexington, returned with withdrew, and shortly after, men from different places, an account that they had taken a white man prisoner, Lexington and its vicinity, that Dunlap's celebra- in the neighborhood collected to the amount of forty, and had brought him as far as the Ohio eiver, when in and pursued the Indians, and within a mile of the sta- the night, while they were asleep, they were suddenly tion, overtook and defeated them. The Indians in this attacked by a party of whites, who killed all his com affair lost six men killed, and several wounded, as ap- panions, and probably likewise the poor defenceless peared by the bloody trails the whites had one killed prisoner, who was lying on his back, tightly bound

In the spring of the year 1731, it appearing that Fort Alexa der M'Connell, may be seen in the Western Review for April 1820, and was furnished by himself.

[Section 12 will contain an account of the settlement]

be relied on. There is a general remark, communicated by some private letter, that things remained without alteration; and intelligence received nation.

It does not appear certain that Athens has fallen ians fired they dispersed.

as stated in our former advices, but the advanced guard of the enemy, about 4,000 strong, making daily attacks on the city of Athens, which is defended by only a small number of Romeliot Greeks who show no small degree of firmness. Several of ken prisoners. Col. Logan immediately raised a comed at Mathana, watches the movements of the enethe Indians, retook the two women and three of the my, but has not yet ventured to attack them. One undred and fifty of the new disciplined troops have deserted him with their arms and baggage. Another account says the Turks have burned will be spared in collecting such ir formation as will have Athens, and sent the Greek prisoners to Negrooont. News of the defeat of the Greeks before Athens had been received at Zante, but was supposed to want confirmation. A report has reached Paris that the Turks had been defeated at Athens. German, Turkish, Italian and French accounts are mixed up together, without regard to dates or facts in a state of unutterable confusion.

A respectable traveller, who arrived at Trieste on the 21st of August, and who was at Napoli di Romania on the 21st of July, and at Syra on the ed. In this action Capt Estill and seven of his men 31st states that in Napoli, there were 10,000 setwere killed, and four mortally wounded. The loss on diers. Colocotroni, their commander, insisted on about four leagues from the town, but the troops refused, and would only fight behind the walls. Innumerable fugitives from the interior of the Morea were encamped about the town in wretched barracks. The fortress was amply provided with ed three times for one dollar and fifty cents, longer Morea were encamped about the town in wretched

provisions and ammunition. The Italian Journal contains the following arti sued, in which Holder and his party were defeated, cle dated Aucona, August 15:-"Letters direct from Napoli di Romania gives minute details of an important battle fought near Laconia, in the counry of the Mainotes, in which the Turco Egyptians lost several thousand men, besides all their baggage and artillery, which fell into the hands of the game. Having succeeded in killing a deer at some dis- Greeks. COMMUNICATED.

OBITUARY. Departed this life on Wednesday the 25th inst another of the few remaining patriots of the Revo Intion, Col. Wm. Steele, of Woodford, in the 71st

vear of his age. After serving his country in that arduous strughe emigrated to the then, almost uninhabited Kentucky, and became one of the earliest surveyors under the Virginia land laws. The duties of this office he extensively performed under the great perils and difficulties then incident to such hazardous employment. Col. Steele, without personal ambition, possessed a happy combination of good nature and talents, his popularity was conspicuous, whenever that he was a member of both the Kentucky Con ventions, and once of the Legislature, the only time he ever tendered his services. In the early settle many others, on whose memory with his, our sense in the double capacity of citizens and soldiers. A large proportion of his compatriots fell by the hand f the common enemy, and of the others, he has been providentially spared for one of the last, to leave this stage of mortal action. Col. Steele at session of the field. Not feeling inclined however, to every period of his life, has had a good taste and predilection for science, and especially for such of its applications as are practically useful. As a citizen, a neighbour, companion or friend, his life has been too short to meet with a superior. Benevolence towards his fellow men, marked his

character, perhaps more strongly than any other trait in it. But he is gone and has left an amiable family depressed in sorrow, and numerous friends to October 27th, 1826.

PROPOSALS BY JOHN FRANCIS DUFOUR,

POSTMASTER AT VEVAY, INDIANA, For publishing by Subscription, a Weekly Agricul

tural Journal, under the title of the

WESTERN FARMER.

F in laying these proposals before the public, as apology is due, for adding one more to the lon ist of periodicals of the day, it will suffice to ob erve hat while those kinds of publications which are deve ed to Religion, Literature, Politics &c are very nu nerons, and still increasing in numbers, those devoted o Agriculture are but few, and their number remain and all enlightened agriculturalists will readily perceive the advantages to be derived from the publication of

By means of the Western Farmer, that most nume us class of our Fellow-Citizens, will b enabled to ob tain the aid in the pursuit of their avocation, which is derived from the interchange of ideas, and the mutual communication of experiment, discoveries &c. &c. To THE GREEKS.

Greece.—There is no news from Greece that can

promote this end its pages shall be principally occupied by communications from practical agriculturalists.

Original Essays, and selections from Domestic and Foreign publications, on Agriculture, Horticulture, Rural nd Domestic Economy.

The editor having on hand a number of interesting answers to a Circular which in January, 1825, he directed to many gentlemen throughout the Union, on the culture of the VINE, (which ill health and other ircumstances have hitherto prevented him from pub shing) and being an eve witness to the successful experiments which have been made and are now making in that branch of agriculture, as well as in the rearing of the SILK WORM in Vevay and its vicinity, will have it in his power to lay before his readers, a con-siderable tock of valuable information on those impor-

The markets for the surplus productions of a great part of the farming population of the Western Country being so often glutted, the introduction of some new objects of culture, the products of which shall be d ed such as would find an advantageous market, either a tendency to facilitate the undertaking, as well as to render this work useful and interesting to the great body of American Farmers

CONDITIONS.

1. THE WESTERN FARMER will be printed on a Suer-royal half sheet, good paper, in such form that each number shall contain eight pages and be deposited in the Post Office, securely wrapped, to be forwarded by mail to subscribers, at THREE DOLLARS per annum, pay ble in advance, or on the appearance of the first num-

Fifty two numbers will form a volume, to which a itle page and an Index will be added. Publication c. n.mence so soon as a sufficient number of subsri-ers shall have been obtained to defray the expenses.

3. Advertisements relating to literature, useful inentions sale of lands, live stock, seeds, plants, farmes in proportion; but not more than one eighth part the paper shall be open for advertisements

* * All postmasters are authorized and requested to ceive subscription for the editor, and to retain ten r cent. of the amount collected and send a list of bscribers' names so soon as obtained.

Communications from practical farmers, and other centlemen, on any subject connected with the object f the Western Farmer, are solicited, and will be hankfully received and duly attended to, if addressed to John Francis Durour, Postmaster, Yevay, Indiana.

attendance of a janitor CHARLES HUMPHREYS.

POETRY.

LAW AND WAR.

At a late meeting of gentlemen under a commis-sion of bankruptcy at Andover in England some disagreement arose between Mr. Fleet and Mr. Mann oth respectable Solicitors, which produced a challenge from the former. The latter returned the following answer. The last stanza but one will be more perfectly understood, when it is known that Mr. Mann has a wife and children, while Mr. Fleet

TO KINGSTON FLEET, Esq. I am honoured this day, sir, with challenges two, The first from friend Langdon, the second from you; As the one is to fight, and the other to dine, I except his "engagement," and yours must decline.

Now in giving this preference, I trust you'll admit I have acted with prudence, and done what was fit, Since encountering HIM, and my weapon a knife, There is some little chance of preserving my life, Whilst a bullet from you, sir, might take it away, And the maxim you know, is, to live while you

If however, you still should suppose I treat you, By sternly rejecting this challenge to meet you, Bear with me a moment, and I will adduce Three powerful reasons by way of excuse:

In the first place, unless I am grossly deceived, I myself am in conscience the party aggrieved; And therefore, good sir, if a challenge must be, Pray wait till that challenge be tendered by me.

Again, sir, I think it by far the most sinful, To stand and be shot at, than to sit for a skinful: From he ce you'll conclude, (as I'd have you in-

That lighting composes no part of my creed—And my courage, (which though it was never dispu-Is not I imagine too, too deeply rooted)

Would prefer that its Fruit, sir, whate'er may Should appear at "the table" and not in "the field."

And lastly my life, be it never forgot, Possesses a value which yours, sir, does not, So I mean to preserve it as long as I can, Being justly entitled "a family Mann" With three or four children (I scarce know how

While you, sir, have not, or ovent not to have, any Besides that the contest would be too unequal, I doubt not will plainly appear by the sequel; For e'en rou must acknowledge it would not be

That one small "Mann of war" should engage a whole Fleet.

> FROM THE TRENTON EFPORIUM. The world has many wiles, Go, taste her pleasures, go-Many have gone in rosy smiles Who soon returned in woe-There's treachery—there's treachery— In pleasure's bowl, that sparkles bright, As son rays in the evening sky, O'er storm-clouds throw a golden light,

Go, go, at Fashion's call-Where fortune's trappings shine-And twine the festive coronal, The wreath of pleasure, twine-But when the world deceives, And sadness clouds thy brow, Come, rest thee, on the heart that grieves To think of parting now.

FROM THE TRENTON EMPORIUM. AUTUMN. The smiles of the Summer are past, The labours of Flora are o'er; Ah! season too charming to last, And almost too fleet to deplore.

Of late like the sailor so gay, Who sings in the top of the shrouds, The lark from on high turn'd bis lay, Now seen, and now lost, in the clouds.

Of late how the banks were array'd, Wherever you rivulets run! To hide from the rays of the sun.

The seasons are past-O how frail! Like dews of the morning they fly-The flow'r has forsaken the vale, The tenant of earth, the sky.

What wars the wild elements wage, Chill Autumn has taken his stand, And seems, as he howls, to presage The norrors of Winter at hand.

Ah me! how august, how sublime How swift are the footsteps of time,

How transient the dates of the year! Our Summer of life must decay-Its Autumn at farthest is near; Then let us be wise while we may, Ere time steals a march on our year.

Let us husband, with care, lest it die, The taper of life, while it burns, And learn to improve as they fly The days which can never return. Princeton, 1826.

MISCELLANEOUS.

From the National Intelligencer. REVOLUTIONARY DOCUMENT.

It is doubted whether the following document, furnished to us by a correspondent in the East, has ever found place in history, or even a general circulation at the time of its promulgation. It is how ever, undoubtedly authentic, and is at this day a political curiosity, in which light it is offered to our readers, who will not fail to recollect, that on the 17th October, in the same year, the proud spirit which dictated this proclamation of the 23d June, 1777, was humbled to the surrender of the whole army at Saratoga.

By John Burgoyne, Esq. &c. &c Lieutenant General of his Majesty's armies in America, Colonel of the Queen's regiment of Light Dragoons, Governor of Fort William, in North Britain, one of the Representatives of the Commons of Great Britain in Parliament, and commending an army

and fleet in an expedition from Canada, &c. &c. The forces entrusted to my command are designed to act in concert and upon a common principle with the numerous armies and fleets which already display, in every part of America, the power, the instice, and, when properly sought, the mercy of the King. The cause in which the British armies are thus exerted applies to the most affecting interest of the human heart; and the military servants of the crown are first called forth for the sole purpose of restoring the rights of the Constitution now combine with the love of their country and du ty to their Sovereign the other extensive excitements which spring from a due sense of the general privileges of mankind. To the eyes and ears of the comperate part of the public, and to the breasts o suffering thousands in the provinces, be the melanche'y appeal, whether the present unnatural rebell av and, lion has not been made the foundation for the com-t trifling.

which verify the affirmative. These are inflicted I bought them and paid for them. ov assemblies and committees-who dare to profess hemselves friends of liberty-upon the most quiet objects, without distinction of age or sex, for the ole crime, often for the sole suspicion, of having adhered in principle to the Government under which they were born, and to which by every tie, Divine and human, they owe allegiance. To consummate these shocking proceedings, the profanation of re-

ligion is added to the most profligate prostitution

ly to bear arms, but also to swear subjection to an surpation they abhor. Animated by these considerations, at the head of troops in the full power of health, discipline and valor, determined to strike where necessary, and anxious to spare where possible, I, by these presents, invite and exhort all persons, in all places a harangue. where the progress of this army may point, -and, by the blessing of God, I will extend it far-to maintain such a conduct as may justify me in pretecting their lands, habitations, and families. The intention of this address is to hold forth security, not depredation, to the country. To those whom spirit and principle may induce to partake in the gloritask of redeeming their countrymen from dun-geous, re-establishing the blessings of legal Gov-ernment, I offer encouragement and enjoyment. And upon the first intelligence of their association, will find means to assist their undertakings. The domestic, the industrious, the infirm, and even the timid inhabitants, I am desirous to protect, provided they remain quietly at their homes; that they do not suffer their cattle to be removed, or their corn or forage to be secreted or destroyed; that they do not break up their bridges or roads, nor by

provisions brought to my camp will be paid for at an equitable rate in solid coin. In consciousness of Christianity, my royal master's clemency, and the honor of soldiership, I have dwelt upon this invitation; and let not people be led to disregard it, by considering the immediate situation of my camp. I have but to give stretch to the Indian forces under my direction, and they amount to thousands, to overtake the hardened enemies of Great Britain and America; I consider them the same wherever they may lurk. If, notwithstanding these endeavors, and sincere inclinations to assist them, the phrenzy of hostilities should remain, I shall stand acquitted in the eyes of God and man, in denouncing and executing the vengeance | feint estimate of its quantity may be ascertained, of the State against the wilful outcasts. The messengers of justice and of wrath await them in the field; and devastation, famine, and every concomitant harm, that a reluctant but indispensable prosecution of military duty must occasion, will bar the

way to their return. J. BURGOYNE. Camp at the River, June 23d, 1777. By order of his Excellency the Lt. General, ROBT. KINGSTON, Secy.

[The above was copied by Bailey Stettson, on the contiers of Vermont, from the original proclamation, immediately after it was issued, and given by him to an acquaintance, who preserved it to this day. The name and character of the latter, who is yet living, are known to us, and entitle the document to full credit .- EDITORS.]

A LESSON FOR MONARCHS.

During his march to conquer the world, Alexander, the Macedonian, came to a people in Africa, who dwelt in a remote and secluded corner, in peaceful huts, and knew neither war nor conquer-They led him to the hut of their chief, who received him hospitably, and placed before him golden dates, golden figs, and bread of gold. "Do you eat gold in this country?" said Alexander. "I take it for granted (replied the Chief) that thou wert able to find catables in thine own country. what reason then art thou come among us?" gold has not tempted me hither," said Alexander "but I would become acquainted with your manners and customs." "So be it" rejoined the other. "Sojourn among us as long as it pleaseth thee." At the class of the river, we shall not be surprised to hear of considerable damage to bridges, boats, &c. the close of this conversation two citizens entered, as into their court of justice. The plaintiff said, "I effect to stop the operations of four mills, exclusive neatness and dispatch, any order in their line. bought of this man a piece of land, and as I was making a deep drain through it, I found a treasure. This is not mine, for I only bargained for the land and not for any treasure that might be concealed beneath it; and yet the former owner of the land will not receive it." The defendant answered, "1 hope I have a conscience, as well as my fellow citizen. I sold him the land with all its contingent as of greater violence, considering its duration than well as existing advantages, and consequently the any which we recollect to have seen. The rain treasure inclusively.'

The Chief, who was also their Supreme Judge, recapitulated their words, in order that the parties might see whether or not he understood them aright. petnosity of the ocean surge. In some houses the Then after some reflection, he said "thou hast a 30n, friend, I believe?"—"Yes." "And thou addressing the other) a daughter?" "Yes."—"Well, then, let thy son marry thy daughter and bestow the treasure on the young couple, for a marriage portion." Alexander seemed surprised and perplexed. "Think you my sentence unjust?" the Chief asked him. "O no!" replied Alexander: "but it astonishes me." "And how, then." rejoined the chief, "would the case have been decided in your country?" "To confess the truth," Said Alexander, "we should have taken both parties into custody, and have seized the treasure for the King's "For the King's use" exclaimed the chief "Does the sun shine on that country?"—"O yes."
"Does it rain there?" "Assuredly." Wonderful! But are there tame animals in the country, that live on the grass and green berbs?" "Very many and of many kinds." "Ay, that must then be the cause," said the chief; "for the sake of those innocent animals the all gracious being continues to let the sun shine and the rain drop down on your own ountry, since its inhabitants are unworthy of such

To cure the Piles .- Take of hogs' lard eight parts nut galls one part. Pulverize the galls very fine ly, and sift through a fine seive; then rub what comes through the seive to a powder. Melt the lard add the galls, and stir it till cold. Apply it to the part affected, several times a day. Take from 20 to 30 drops of balsam of Copavia on a little sugar, each night, and the yolk of an egg immediately after it. The writer has never known this application made without success.

Bad things .- An unfaithful servant, a smooky house, a stumbling horse, a scolding wife, an aching tooth, an empty purse, an undutiful child, an incessant talker, hogs that break thro' enclosures, a dull razor and a pimpled face-a butting ram, musquitoes and bed bugs in a bed chamber.

A man much intoxicated, passing up Walnut purchasers.

French luting used in propagating Fruit Trees, by

grafting them. The best luting wherewithal to cover the newly grafted scion is composed of equal qualities of train oil and rosin, prepared in the following manner:-First melt the rosin in an earthen vessel, and then pourit into the oil; mix them well, to be applied when cold; with a painter's brush. The composi-tion is used in the N. W. part of France (Bre-tagne) with general success. It has this advantage that it never cracks, nor admits rain or wind to the grafts, which is the usual cause of their failing. It is more expeditiously put on than the common clay covering, and looks much neater; but what renders it more useful is that the grafts covered with the composition seldom fail, scions laid under the earth or steeped in water for a few days, grow better any other acts, directly or indirectly, endeavor to than those taken fresh from the parent tree. Grafting cherry or pear trees should not be delayed lating cherry or pear... ter than St. Patrick's day. New Monthly Magazine.

PETERSBURG, VA. Oct. 13. Freshet .- It commenced raining moderately on Wednesday morning last, and continued during the day, but not to such an extent as to create any apprehensions of a serious rise of water in the Appo mattox; but as night came on, the rain continued to increase till about twelve o'clock, when the windows of heaven appeared to be open indeed, and the rain fell literally in a solid sheet, and continued till about day break yesterday morning. We have no means of ascertaining how many inches of water fell during the twenty-four hours it rained; but a when we state, that before sun-rise, the Appomattox river, from having been previously quitelow rose with an unprecedented rapidity, and overflow ed its banks to a considerable extent. The whole of the Sandy Beach was inundated, and the damage done to goods and produce stored in the lower stories of the lumber houses on the wharf must be serious. The cellars adjacent to the Brick-House Run, were partially filled with water, and as they were generally stored with perishable articles

What rendered the rise of the water in the Apponattox the more extraordinary, is the fact, that from about the time it commenced rising in the night, the tide was falling and continued to fall, till about sun rise.

such as salt, sugar, &c. the loss must be considera

Since preparing the foregoing for the press, we ave made enquiries as to the other damages susained by the late unparalled fall of rain; and we re gret to have to state that the losses in the heart of the town were comparatively small to what has been sustained elsewhere. The entire arch of the Appomattox canal, immediately below the locks, is gone, and with it Mr. Giles Well's mill. The dam across the Appomattox river, at Kendall's mills, is also gone, in a great measure, the water making a clear breach through the centre, for a considerable distance. Part of the arch across the Brick-House run, at the Baptist Church, is also carried away. We have no tidings from above, but from the frag-

NEW-YORH, Oct. 13. Tempest .- Yesterday morning, about 3 o'clock, a storm commenced which lasted with but little intermission until late last night. It was a tempest poured down as though an inexhausable water spont was emptying itself upon us, and the fury of the blast drove it through the streets with the imwater came so copionsly into the kitchens that "all hands were kept to the pumps," or rather buckets, to keep it from floating the furniture, and putting out the fires. In Pearl-Street, and all the streets below, many of the cellars are filled; and in Varick and Chapel-streets, and the houses upon all the made ground, the inhabitants were literally deluged. In some instances, we are informed that the fire engines were put in requisition to throw off the
